

## Sparkling Water Sodas Bottle Caps

Aluminium sparkling water soda bottle caps are a vital product in the manufacturing of beverage packaging. This product is widely used in the sealing of bottled beverages such as water, soda, and other carbonated drinks. Aluminium soda screw caps are reliable, cost-effective, and easy to use. These caps provide an airtight seal with a high level of security that ensures the freshness and quality of the beverage.

They are available in different sizes, colors, and designs to cater to the needs of our customers. These screw caps come with an easy-to-use thread that ensures the cap is tightly sealed, preventing any leakage or contamination of the beverage. Aluminum screw caps are professionally used for gas contained drink and beverage, fitting to American standard GPI 1650 bottle finish and European standard MCA2 bottle finish.

| Material          | Aluminum                                      |
| Thickness         | 0.23 mm                                       |
| Sealing type      | Screw cap                                     |
| Dimensions        | 28*18mm, 28*15.5mm                            |
| Color             | Any color as customer requirement             |
| Surface treatment | Printing / embossing / hot foil / silk screen |
| OEM/ODM           | Welcome,we could produce mold for you.        |
| Samples           | Free Samples                                  |
| Packaging         | Standard safety export carton or customized.  |

### Application of Sparkling Water Sodas Bottle Caps:

#### 1. Carbonated soft drinks

Cola: such as Coca-Cola and Pepsi, contain high sugar or sweeteners and caffeine.

Lemon-flavored soda: such as Sprite and 7-Up, fresh and refreshing.

Fruit-flavored soda: such as Fanta, offers a variety of fruit flavors.

Energy drinks: such as Red Bull and Monster, contain stimulants such as caffeine and taurine.

## 2. Soda water

Unflavored or lightly flavored, the main ingredients are water and carbon dioxide, and may contain a small amount of salt or minerals.

## 3. Sparkling water

Naturally carbonated mineral water (such as Perrier) or artificially carbonated water, with a fresh taste and fine bubbles.

### **Advantages of Sparkling Water Sodas Bottle Caps:**

- Good sealing: Aluminum screw caps can provide good sealing and effectively prevent gas leakage, thereby maintaining the bubbles and freshness of soda.
- Corrosion resistance: Aluminum has good corrosion resistance, which can effectively protect beverages from the influence of the external environment and extend the shelf life.
- Recyclability: Aluminum materials are easy to recycle, meet the requirements of sustainable development, and help reduce environmental pollution.
- Cost-effectiveness: Compared with other materials, aluminum caps have lower costs in production and processing, which can save money for enterprises.
- Easy to open: Aluminum bottle caps are usually designed to be easy for consumers to open, enhancing the user experience.
- Beautiful appearance: Aluminum bottle caps can be decorated by printing, spraying, etc. to enhance the visual appeal of the product.
- Good anti-counterfeiting: Aluminum bottle caps can be designed in an anti-counterfeiting form to increase the safety of the product.
